Syrian Virtual University      2021 \_2024      My average : 70%

## PROJECTS :

### • Airplanes Travel and Tourism Company

- 1.December 2023 - February 2024
- 2.When people intend to travel and tour some countries, they may face many major problems,
- 3.So I decided to build a website that serves people to book trips attached to the site with details about each tourist city and they can open the site easily and choose the appropriate trip and city for them when people intend to travel and tour some countries, (HTML5 and CSS and more than 4 other skills).
- 4.[https://mohamedfirasalfarra.github.io/Royal\\_Airplanes/](https://mohamedfirasalfarra.github.io/Royal_Airplanes/)

- **CRUD PRODUCT MANAGEMENT SYSTEM**

1. September 2023 - October 2023
2. A website for selling electronic products such as phones, computers, iPads, and TV screens by displaying specifications (price, tax, discounts, ads, quantity, and specifying the available item).
3. This is stored in a database in the Java Script language.

**[https://mohamedfirasalfarra.github.io/C\\_R\\_U\\_D/](https://mohamedfirasalfarra.github.io/C_R_U_D/)**

- **Calculator**

1. Create a website that is a calculator that takes both black and white perspectives, allowing you to do all mathematical operations (not logical or global ones like square root or exponent operations).

2. **<https://mohamedfirasalfarra.github.io/MyCalculator/>**

Skills: HTML5 · CSS · JavaScript

- **Sports Club**

1. It is a sports club for men and women for bodybuilding and fitness. The site contains several sections and each section talks about a specific thing such as sports machines, Zumba, fitness exercises, etc. There is also a section for bulking and slimming meals
